Topic 1 - Question Set 1

Question #1*Topic 1*

Your company has serval departments. Each department has a number of virtual machines (VMs).
The company has an Azure subscription that contains a resource group named RG1.
All VMs are located in RG1.
You want to associate each VM with its respective department.
What should you do?

- A. Create Azure Management Groups for each department.
- B. Create a resource group for each department.
- C. Assign tags to the virtual machines.
- D. Modify the settings of the virtual machines.

Correct Answer: *C*

C (100%)

Question #2*Topic 1*

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
Your company has an Azure Active Directory (Azure AD) subscription.
You want to implement an Azure AD conditional access policy.
The policy must be configured to require members of the Global Administrators group to use Multi-Factor Authentication and an Azure AD-joined device when they connect to Azure AD from untrusted locations.
Solution: You access the multi-factor authentication page to alter the user settings.
Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: *B*

Question #6*Topic 1*

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.
Your company makes use of Multi-Factor Authentication for when users are not in the office. The Per Authentication option has been configured as the usage model.
After the acquisition of a smaller business and the addition of the new staff to Azure Active Directory (Azure AD) obtains a different company and adding the new employees to Azure Active Directory (Azure AD), you are informed that these employees should also make use of Multi-Factor Authentication.
To achieve this, the Per Enabled User setting must be set for the usage model.
Solution: You reconfigure the existing usage model via the Azure portal.
Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: *B*
