Exam: VMware Cloud Foundation 9.0 Administrator

Number of questions in the database: 100

Exam Version: NOV.2026

Question #1Topic 1

Which VMWare Cloud Foundation (VCF) Automation component provides a self-service catalog in the VM Apps tenant?

A. VCF Service Broker

B. VCF Config

C. VCF Assembler

D. VCF Operations Orchestrato

Correct Answer: A

Question #2Topic 1

A security team informed an administrator that a VMware vCenter root password was compromised. As a precaution, the password was changed directly in vCenter.

What should an administrator do to regain management capability of this vCenter by VMWare Cloud Foundation (VCF) Operations?

A. Use the Rotate password function in VCF Operations.

B. Enter the new root password using the Reset password function in VCF Operations.

C. Enter the new root password using the Remediate password function in VCF Operations.

D. Enter the new root password using the Update password function in VCF Operations.

Correct Answer: C

Question #3Topic 1

An administrator is responsible for managing a VMware Cloud Foundation (VCF) Automation organization within a VCF instance. The administrator has been tasked with updating an VMware NSX VPC by editing the NSX Connectivity profile for an NSX Project. The current profile was generated automatically when the NSX VPC was created.

What is the impact of the administrator making this change to the NSX VPC?

https://dbcloud.academy/

A. All NSX VPCs associated with the VCF Automation organization will be updated with the new VPC connectivity profile.

B. All NSX VPCs that use the default VPC connectivity profile will be updated with the new VPC connectivity profile.

C. Only the selected NSX VPC will be updated with the new VPC connectivity profile.

D. Only the NSX VPCs within the corresponding NSX Project will be updated with the new VPC connectivity profile.

Correct Answer: C

Question #4Topic 1

An administrator is tasked to obtain an overview of all VMware vSAN and non-vSAN datastores within a VMware Cloud Foundation (VCF) environment using VCF Operations.

Where can the administrator access the required information?

A. Data Protection & Recovery

B. VCF Health

C. Diagnostic Findings

D. Storage Overview

Correct Answer: D

Question #5Topic 1

An administrator has been tasked with deploying a new VMware Cloud Foundation (VCF) instance using a supported VCF Operations model that has the smallest possible resource footprint.

Which VCF Operations deployment model should the administrator use?

A. Continuous Availability

B. High Availability

C. Simple

D. Stretched Cluster

Correct Answer: C

https://dbcloud.academy/

Question #6Topic 1

Which three statements are characteristics of a VMware Cloud Foundation (VCF) private cloud? (Choose three.)

A. VCF supports only the industry and regulatory compliance offered by the cloud service provider.

B. VCF offers automation of operations and the ability to optimize network services.

C. VCF supports the provisioning of both VMs and containers.

D. VCF supports only vSAN storage technology.

E. VCF offers manual scalability of the environment through configurations or custom scripts.

F. VCF offers the ability to configure full isolation of organizations in the private cloud.

Correct Answer: BCF

Question #7Topic 1

An administrator is preparing to deploy a new VMware Cloud Foundation (VCF) fleet to an environment that does not have internet access.

Which two binaries must be uploaded to the VCF Installer appliance before initiating the deployment? (Choose two.)

A. ESX

B. VCF Operations

C. NSX

D. Lifecycle Manager

E. Identity Broker

Correct Answer: AC

Question #8Topic 1

An administrator is responsible for managing a VMware Cloud Foundation (VCF) fleet. The administrator has been tasked with creating a solution that allows Kubernetes development teams to complete the self-service creation of Active Directory (AD) accounts with the following requirements:

•Only users within the Development tenant should be able to create user accounts.

•Users must be able to create and destroy user accounts in the development AD only.

https://dbcloud.academy/

The administrator has already deployed a dedicated VCF Operations orchestrator for the Development tenant.

What four additional tasks must the administrator complete to meet the stated objective? (Choose four.)

A. Configure the VCF Operations orchestrator integration to utilize the embedded VCF Operations orchestrator.

B. Configure the VCF Operations orchestrator Active Directory plugin to connect to the production Active Directory.

C. Configure the VCF Operations orchestrator integration to connect to the dedicated VCF Operations orchestrator.

D. Publish the Active Directory User creation workflow to the self-service catalog in VCF Automation through the Content Hub.

E. Create a Custom Resource object and select the appropriate VCF Operations orchestrator workflows for object creation and destruction.

F. Publish the Active Directory User creation action to the self-service catalog in VCF Automation through the Content Hub.

G. Configure the VCF Operations orchestrator Active Directory plugin to connect to the development Active Directory.

Correct Answer: CDEG

Question #9Topic 1

An administrator is deciding on a storage solution to create the first management workload domain for a new VMware Cloud Foundation (VCF) instance.

Which three storage solutions can the administrator use as principal storage? (Choose three.)

A. NVMe/TCP

B. VMFS on Fibre Channel (FC)

C. NFSv3

D. vSAN OSA

E. Virtual Volumes (vVols)

Correct Answer: BCD
