Exam Version: NOV.2026

Question #1Topic 1

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to- business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

How should Prisma Access be implemented to meet the customer requirements?

A. Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal connection types, and the second with remote networks and private application access for B2B connections - and use the Strata Multitenant Cloud Manager Prisma Access configuration scope to manage access.

B. Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the Prisma Access Configuration scope to manage all access.

C. Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal connection types, and the second with remote networks and private application access for B2B connections - and use the specific configuration scope for the connection type to manage access.

D. Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the specific configuration scope for the connection type to manage access.

Correct Answers: D

Question #2Topic 1

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to- business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

How can the engineer configure mobile users and branch locations to meet the requirements?

A. Use GlobalProtect and Remote Networks to filter internet traffic and provide access to data center resources using service connections.

B. Use Explicit Proxy to filter internet traffic and provide access to data center resources using service connections.

C. Use GlobalProtect to filter internet traffic and provide access to data center resources using service connections.

D. Use Explicit Proxy and Remote Networks to filter internet traffic and provide access to data center resources using service connections.

Correct Answers: A

Question #3Topic 1

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to- business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

https://dbcloud.academy/

The network team must have access to manage only the partner access.

Which two options will allow the engineer to support the requirements? (Choose two.)

A. Configure the CPE with Static Routes pointing to Prisma Access Infrastructure and Mobile User routes.

B. Enable eBGP for dynamic routing and configure RemoteNetworks.

C. Configure Remote Networks and define the branch IP subnets using Static Routes.

D. Enable Remote Networks Advertise Default Route.

Correct Answers: BD

Question #4Topic 1

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to- business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

Which two components can be provisioned to enable data center connectivity over the internet? (Choose two.)

A. ZTNA Connector

B. SD-WAN Connector

C. Service connections

D. Colo-Connect

Correct Answers: AC

Question #5Topic 1

Which two actions can a company with Prisma Access deployed take to use the Egress IP API to automate policy rule updates when the IP addresses used by Prisma Access change? (Choose two.)

A. Configure a webhook to receive notifications of IP address changes.

B. Copy the Egress IP API Key in the service infrastructure settings.

C. Enable the Egress IP API endpoint in Prisma Access.

D. Download a client certificate to authenticate to the Egress IP API.

Correct Answers: AB

Question #6Topic 1

When using the traffic replication feature in Prisma Access, where is the mirrored traffic directed for analysis?

A. Specified internal security appliance

B. Dedicated cloud storage location

C. Panorama

D. Strata Cloud Manager (SCM)

Correct Answers: B

Question #7Topic 1

How can an engineer verify that only the intended changes will be applied when modifying Prisma Access policy configuration in Strata Cloud Manager (SCM)?

A. Review the SCM portal for blue circular indicators next to each configuration menu item and ensure only the intended areas of configuration have this indicator.

B. Compare the candidate configuration and the most recent version under “Config Version Snapshots.”

C. Select the most recent job under Operations > Push Status to view the pending changes that would apply to Prisma Access.

D. Open the push dialogue in SCM to preview all changes which would be pushed to Prisma Access.

Correct Answers: B
