Technology Provider: Palo Alto Networks

Exam: Palo Alto Networks Certified Network Security Professional

Number of questions in the database: 90

Exam Version: NOV.2026

Question #1Topic 1

Which two tools can be used to configure Cloud NGFWs for AWS? (Choose two.)

A. Prisma Cloud management console

B. Cortex XSIAM

C. Cloud service provider (CSP) management console

D. Panorama

Correct Answer: CD

Question #2Topic 1

In which two applications can Prisma Access threat logs for mobile user traffic be reviewed? (Choose two.)

A. Prisma Cloud dashboard

B. Strata Cloud Manager (SCM)

C. Strata Logging Service

D. Service connection firewall

Correct Answer: BC

Question #3Topic 1

A network security engineer needs to implement segmentation but is under strict compliance requirements to place security enforcement as close as possible to the private applications hosted in Azure.

Which deployment style is valid and meets the requirements in this scenario?

A. On a PA-Series NGFW, configure several Layer 3 zones with Layer 3 interfaces assigned to logically segment the network.

B. On a VM-Series NGFW, configure several Layer 3 zones with Layer 3 interfaces assigned to logically segment the network.

C. On a VM-Series NGFW, configure several Layer 2 zones with Layer 2 interfaces assigned to logically segment the network.

D. On a PA-Series NGFW, configure several Layer 2 zones with Layer 2 interfaces assigned to logically segment the network.

Correct Answer: B

Question #4Topic 1

When adding a Zero Touch Provisioning (ZTP) firewall to Panorama, when can the firewall be powered on?

A. During license activation

B. After activating registration and completing license deployment profile

C. After all required installation and setup procedures are completed

D. During installation

Correct Answer: B

Question #5Topic 1

Which profile can help prevent the transmission of sensitive information to internet applications?

A. Antivirus

B. Data Filtering

C. Anti-spyware

D. URL Filtering

Correct Answer: B

Question #6Topic 1

How do template stacks help manage firewall configurations in Panorama?

A. By grouping templates across multiple firewalls

B. By creating template variables for permanent configurations in firewalls

C. By creating a diagram of the network for a view of all firewalls

D. By handling firmware updates across multiple firewalls

Correct Answer: A

Question #7Topic 1

Which subscription sends non-file format-based traffic that matches Data Filtering profile criteria to a cloud service to render a verdict?

A. SaaS Security Inline

B. Enterprise DLP

C. Advanced URL Filtering

D. Advanced WildFire

Correct Answer: B

Question #8Topic 1

A cloud security architect is designing a certificate management strategy for Strata Cloud Manager (SCM) across hybrid environments.

Which practice ensures optimal security with low management overhead?

A. Implement separate certificate authorities with independent validation rules for each cloud environment.

B. Configure manual certificate deployment with quarterly reviews and environment-specific security protocols.

C. Use cloud provider default certificates with scheduled synchronization and localized renewal processes.

D. Deploy centralized certificate automation with standardized protocols and continuous monitoring.

Correct Answer: D

Question #9Topic 1

Which two prerequisites must be evaluated when decrypting internet-bound traffic? (Choose two.)

A. Incomplete certificate chains

B. RADIUS profile

C. Certificate pinning

D. SAML certificate

Correct Answer: AC
