Topic 1 - Exam A

Question #1*Topic 1*

Overview -
Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide.
Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States.

Existing Environment -

Active Directory Environment -
The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication. Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts.
All users authenticate to on-premises applications by signing in to their device by using a UPN format of username@fabrikam.com.
Fabrikam does NOT plan to implement identity federation.

Network Infrastructure -
Each office has a high-speed connection to the Internet.
Each office contains two domain controllers. All domain controllers are configured as DNS servers.
The public zone for fabrikam.com is managed by an external DNS server.
All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS.
All the Exchange servers have the latest cumulative updates installed.
All shared company documents are stored on a Microsoft SharePoint Server farm.

Requirements -

Planned Changes -
Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription.
Fabrikam plans to implement two pilot projects:
Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
Project2: After the successful completion of Project1, Microsoft Teams will be enabled in Microsoft

https://dbcloud.academy/

365 for the sales department users.
Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

Technical Requirements -
Fabrikam identifies the following technical requirements:
All users must be able to exchange email messages successfully during Project1 by using their current email address.
Users must be able to authenticate to cloud services if Active Directory becomes unavailable.
A user named User1 must be able to view all DLP reports from the Microsoft Purview compliance portal.
Microsoft 365 Apps for enterprise applications must be installed from a network share only.
Disruptions to email access must be minimized.

Application Requirements -
Fabrikam identifies the following application requirements:
An on-premises web application named App1 must allow users to complete their expense reports online. App1 must be available to users from the My Apps portal.
The installation of feature updates for Microsoft 365 Apps for enterprise must be minimized.

Security Requirements -
Fabrikam identifies the following security requirements:
After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
The membership of the UserLicenses group must be validated monthly. Unused user accounts must be removed from the group automatically.
After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.
The principle of least privilege must be used.
You are evaluating the required processes for Project1.
You need to recommend which DNS record must be created while adding a domain name for the project.
Which DNS record should you recommend?

- A. host (A)
- B. host information (HINFO)
- C. text (TXT)
- D. pointer (PTR)

Correct Answer: *C*

The principle of least privilege must be used.
You create the Microsoft 365 tenant.
You implement Azure AD Connect as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

During Project1, sales department users can access **[answer choice]** applications by using SSO.

- both on-premises and cloud-based
- only cloud-based
- only on-premises

If Active Directory becomes unavailable during Project1, sales department users can access the resources **[answer choice]**.

- both on-premises and in the cloud
- in the cloud only
- on-premises only

Correct Answer:

- both on-premises and in the cloud
- in the cloud only
- on-premises only

Question #5*Topic 1*

Your company has a Microsoft 365 subscription.
You need to identify all the users in the subscription who are licensed for Office 365 through a group membership. The solution must include the name of the group used to assign the license.
What should you use?

- A. Active users in the Microsoft 365 admin center
- B. Reports in Microsoft Purview compliance portal
- C. the Licenses blade in the Microsoft Entra admin center
- D. Reports in the Microsoft 365 admin center

Correct Answer: *D*

Respuesta por mayor votación de la comunidad

C (100%)

Question #6*Topic 1*

HOTSPOT -
You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Type	Department
User1	Guest	IT support
User2	Guest	SupportCore
User3	Member	IT support

You need to configure a dynamic user group that will include the guest users in any department that contains the word Support.
How should you complete the membership rule? To answer, select the appropriate options in the answer area.
