Exam: Associate VMware Data Center Virtualization
Number of questions in the database: 101
Exam Version: NOV.2026

Topic 1 - Single Topic

Question #1*Topic 1*

Which selection is optional when deploying a new virtual machine in the vSphere Client?

- A. Data center
- B. Compute resource
- C. Guest OS
- D. Folder

Correct Answer: *D*

Respuesta por mayor votación de la comunidad

D (73%)

A (27%)

Question #2*Topic 1*

An administrator is trying to create an alarm action that runs a batch file on a specific VM.
Which alarm action should the administrator use?

- A. Send SNMP traps
- B. Run a PowerCLI command
- C. Run script
- D. Send email notifications

Correct Answer: *C*

Respuesta por mayor votación de la comunidad

C (100%)

Question #3*Topic 1*

A system administrator needs to configure a virtual machine to guarantee that it always gets the appropriate resources even if the host is overloaded and overcommitted.
Which setting on the virtual machine does the administrator need to configure?

- A. vSphere High Availability Admission Control

https://dbcloud.academy/

- B. High Performance Power Policy
- C. CPU and Memory Shares to High
- D. CPU and Memory Reservations

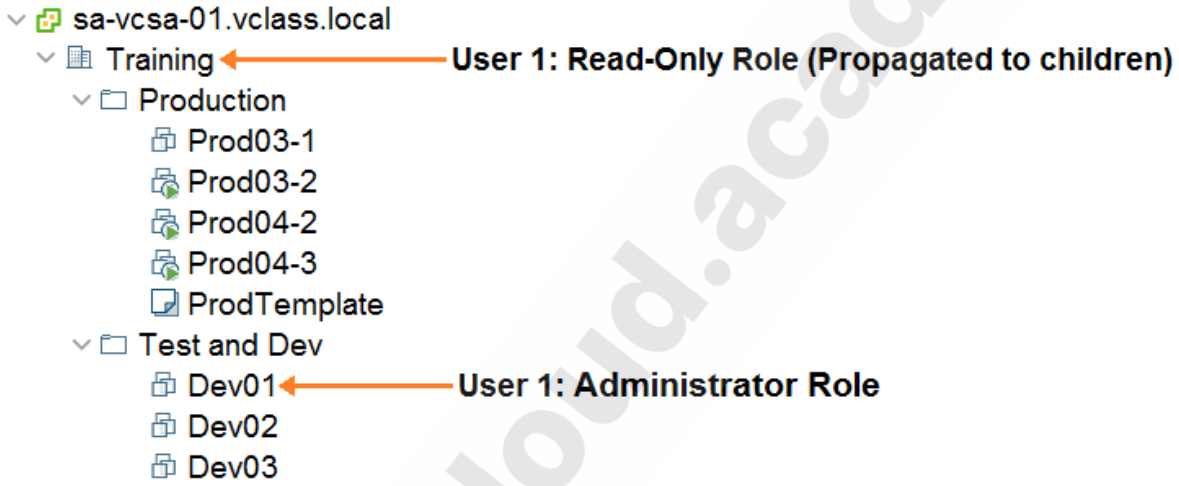

Correct Answer: *D*

D (100%)

Question #4*Topic 1*

Refer to the exhibit:

Which statement is true about the access privileges of User 1?

- A. User 1 has administrator privileges to all objects in the Test and Dev folder.
- B. User 1 has administrator privileges to all VMs in the Production folder.
- C. User 1 has read-only privileges to all objects in the Production folder.
- D. User 1 has read-only privileges to the Dev01 VM in the Test and Dev folder.

Correct Answer: *C*

Respuesta por mayor votación de la comunidad

C (100%)

Question #5*Topic 1*

Which storage protocol is supported by vSphere?

- A. NFS
- B. SMB
- C. CIFS

https://dbcloud.academy/

- D. FTP

Correct Answer: *A*

Respuesta por mayor votación de la comunidad

A (100%)

Question #6*Topic 1*

Which two configuration options can only be enabled on distributed switches? (Choose two.)

- A. Port Mirroring
- B. VLAN IDs
- C. NetFlow
- D. NIC Teaming
- E. Load Balancing

Correct Answer: *AC*

Respuesta por mayor votación de la comunidad

AC (86%)

7%

Question #7*Topic 1*

An administrator needs to migrate a powered off virtual machine to another cluster with no shared storage.
Which option should the administrator select for a successful migration?

- A. Change compute resource only
- B. Change both compute resource and storage
- C. Migrate virtual machine(s) to a specific datacenter
- D. Change storage only

Correct Answer: *B*

Respuesta por mayor votación de la comunidad

B (100%)

Question #8*Topic 1*

Which two block storage protocols are supported on vSphere? (Choose two.)

- A. SAN
- B. SMB

https://dbcloud.academy/

- C. NFSv4.1
- D. iSCSI
- E. NFSv3

Correct Answer: *AD*

Respuesta por mayor votación de la comunidad

AD (94%)

6%

Question #9*Topic 1*

A vSphere operator discovers a storage problem with the following PDL error message:
Permanently inaccessible device :naa.1234567890 has no more open connections.
What should the operator conclude from this error message?

- A. A storage device is disconnected, but it can be reconnected by a host reboot.
- B. A storage device has failed and is expected to become available.
- C. A storage device has failed and is not expected to become available.
- D. A storage device is disconnected, but it is treated as a transient issue.

Correct Answer: *C*

Respuesta por mayor votación de la comunidad

C (100%)

Question #10*Topic 1*

Which piece of information does vSphere DRS consider when making decisions about which host to place a virtual machine?

- A. Storage bandwidth on the host
- B. Network usage by the virtual machine
- C. Network bandwidth on the host
- D. Disk usage by the virtual machine

Correct Answer: *C*

Respuesta por mayor votación de la comunidad

C (63%)

D (25%)
