Topic 1 - Exam A

Question #1*Topic 1*

Refer to the exhibit.

```
config router bgp
     set as 65000
     set router-id 10.1.0.1
     set ibgp-multipath enable
     set additional-path enable
     set additional-path-select 3
     config neighbor-group
        edit "Branches_INET_0"
           set interface "T_INET_0"
           set remote-as 65000
           set update-source "T_INET_0"
        next
        edit "Branches_INET_1"
           set interface "T_INET_1"
           set remote-as 65000
           set update-source "T_INET_1"
        next
        edit "Branches_MPLS"
           set interface "T_MPLS"
           set remote-as 65000
           set update-source "T_MPLS"
        next
     end
     config neighbor-range
        edit 1
           set prefix 10.201.1.0 255.255.255.0
           set neighbor-group "Branches_INET_0"
        next
        edit 2
           set prefix 10.202.1.0 255.255.255.0
           set neighbor-group "Branches_INET_1"
        next
        edit 3
           set prefix 10.203.1.0 255.255.255.0
           set neighbor-group "Branches_MPLS"
        next
     end
...
end
```

The exhibit shows the BGP configuration on the hub in a hub-and-spoke topology. The

https://dbcloud.academy/

administrator wants BGP to advertise prefixes from spokes to other spokes over the IPsec overlays, including additional paths. However, when looking at the spoke routing table, the administrator does not see the prefixes from other spokes and the additional paths.
Based on the exhibit, which three settings must the administrator configure inside each BGP neighbor group so spokes can learn other spokes prefixes and their additional paths? (Choose three.)

- A. Enable soft-reconfiguration
- B. Enable route-reflector-client
- C. Set additional-path to send
- D. Set adv-additional-path to the number of additional paths to advertise
- E. Set advertisement-interval to the number of additional paths to advertise

Correct Answer: *BCD*

Question #2*Topic 1*

What are two advantages of using an IPsec recommended template to configure an IPsec tunnel in an hub-and-spoke topology? (Choose two.)

- A. It ensures consistent settings between phase1 and phase2.
- B. It guides the administrator to use Fortinet recommended settings.
- C. The VPN monitor tool provides additional statistics for tunnels defined with an IPsec recommended template.
- D. It automatically install IPsec tunnels to every spoke when they are added to the FortiManager ADOM.

Correct Answer: *AB*

Question #3*Topic 1*

https://dbcloud.academy/

Refer to the exhibit.

```
config system interface
    edit "port2"
        set vdom "root"
        set ip 192.2.0.9 255.255.255.248
        set allowaccess ping
        set type physical
        set role wan
        set snmp-index 2
        set preserve-session-route enable
    next
end
```

- A. FortiGate does not change the routing information on existing sessions that use a valid gateway, after a route change.
- B. FortiGate always blocks all traffic, after a route change.
- C. FortiGate performs routing lookups for new sessions only, after a route change.
- D. FortiGate flushes all routing information from the session table, after a route change.

Correct Answer: *A*

Question #4*Topic 1*

In a hub-and-spoke topology, what are two advantages of enabling ADVPN on the IPsec overlays? (Choose two.)

- A. It provides the benefits of a full-mesh topology in a hub-and-spoke network.
- B. It enables spokes to establish shortcuts to third-party gateways.
- C. It provides direct connectivity between spokes by creating shortcuts.
- D. It enables spokes to bypass the hub during shortcut negotiation.

Correct Answer: *AC*
