Question #5Topic 1

A customer wants to have the ability to show network usage. Which product would allow them to have this visibility?

A. UXI

B. HPE Aruba Networking ClearPass

C. HPE Aruba Networking Central

D. OS 8.X

Correct Answer: *C*

Question #6Topic 1

What is the best practice for using VSX at the core of a 3-tier design?

A. You should implement VSX at the core when the aggregation layer is layer 3 only with OSPF-routed traffic forwarding between the core and aggregation layers.

B. You should never implement VSX at the core of a 3-tier redundancy core.

C. VSX-lags allow the collapsed core to connect directly to services such as gateways and services only so long as spanning tree is used to prevent loops.

D. You should implement VSX at the core when the aggregation layer operates at layer 2 only.

Correct Answer: *A*

Question #7Topic 1
